Summary

I am a Full Stack Developer and IoT Engineering student with a strong foundation in HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, and IoT-based technologies. Skilled in designing, developing, and deploying responsive web applications using MVC architecture and REST APIs. Passionate about building scalable, user-focused solutions and smart automation systems that solve real-world problems through both software and hardware integration.

Skills

Languages: JavaScript, Java, Python, Embedded C

Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

IoT & Hardware: Arduino UNO, NodeMCU ESP8266, Sensors, Smart Home Automation

Tools: Git, GitHub, Postman, VS Code

Experience

Generative AI Intern

June 2025 – July 2025

PBEL (Virtual Internship) – Remote

Tools: Python, Hugging Face API, React, Node.js, GitHub

- Improved and deployed AI-based applications integrating Hugging Face generative models for image and text generation.
- Built interactive front-end interfaces using React and Tailwind CSS.
- Applied prompt engineering techniques to improve model outputs across multiple use cases.
- Collaborated with a remote team to design, test, and document AI workflows.

Projects

Smart Home Automation | Arduino, Sensors, Programming Language (Embedded C)

Dec 2025 – April 2026

- Designed and developed an IoT-based Smart Home Automation System for remote monitoring and control of home appliances.
- Integrated microcontrollers such as Arduino Uno and NodeMCU ESP8266 for device control.
- Utilized sensors (temperature, motion, light) to enable automation and smart decision-making.
- Developed a user interface via mobile/web app for centralized control of appliances.

Wonderlust – Airbnb Clone Website | EJS, Node.js, Express, MongoDB

Apr 2025 – Jun 2025

- Built a full-stack web application inspired by Airbnb for browsing, adding, and reviewing rental listings.
- Implemented MVC architecture with Express.js, EJS, and MongoDB.
- Implemented Cloudinary API for secure image uploads and user authentication with CRUD features.
- Deployed on Render with responsive UI for cross-device compatibility.

Certifications

- **CISCO:** Internet of Things
- **PCAP:** Programming Essential Python
- **DUCAT:** Android Development
- **NASSCOM:** Introduction to Cybersecurity
- **IBM:** Generative AI
- **DUCAT:** Advanced IoT

Education

B. Tech in Computer Science and Engineering (IoT)

Graduated: 2026

Moradabad Institute of Technology, Moradabad

SGPA: 8.05
