Summary

Full Stack Developer skilled in MERN stack (MongoDB, Express, React, Node.js) with hands-on experience in building scalable web applications. Experienced in designing REST APIs, implementing MVC architecture, and creating responsive UI. Focused on developing efficient, user-centric solutions for real-world problems.

Technical Skills

- **Languages:** JavaScript, HTML, CSS
- **Frontend Development:** React.js, Tailwind CSS, Responsive UI Design
- **Backend Development:** Node.js, Express.js, REST API Development, Authentication (JWT, OTP-based Email Verification)
- **Databases:** MongoDB, MySQL
- **Core Features Implemented:** User Authentication, OTP Verification, Booking Systems, Expense Tracking, Budget Alerts, Date Range Filtering, Resume Analysis, Job Recommendation Systems, Real-time Result Evaluation
- **Tools & Technologies:** Git, GitHub, Postman, API Integration, MVC Architecture

Experience

IBM - AI Intern

June 2025 – July 2025

PBEL (Virtual Internship)

Remote

- Built and deployed AI-based applications using Hugging Face APIs for text and image generation tasks efficiently
- Developed responsive and interactive UI components using React and Tailwind CSS for better overall user experience
- Applied prompt engineering techniques to optimize model outputs across multiple real-world use cases
- Tested and refined AI models to ensure consistent performance and reliable output quality across applications

Projects

Eventora – Event Booking Platform

Feb 2026 – Mar 2026

React, Node.js, Express, MongoDB

GitHub

- Constructed a scalable full-stack event booking platform with seamless user registration, booking, and confirmation features
- Engineered OTP-based email verification system for secure authentication and reliable user validation across the entire platform
- Implemented a robust user authentication system with OTP-based email verification and secure account activation flow across the platform

Smart Expense Tracker

Jan 2026 – Feb 2026

React, Node.js, Express, MongoDB

GitHub

- Developed a full-stack expense tracking application to efficiently monitor, analyze, and calculate detailed monthly user spending patterns
- Implemented advanced budget management feature with real-time alerts and notifications when expenses exceed predefined spending limits
- Enabled flexible date range filtering to efficiently analyze expenses between custom start and end dates
- Designed intuitive and interactive dashboard for tracking total expenses and improving overall financial insights

SkillUp – Career Preparation Platform

Feb 2026 – Present

React, Node.js, Express, MongoDB

GitHub

- Developed an all-in-one platform to help students prepare for placements with coding, aptitude, and reasoning modules
- Integrated real-time result evaluation system to provide instant feedback and performance analysis
- Built resume analysis feature to evaluate user resumes and recommend suitable job opportunities
- Centralized multiple preparation resources into a single platform to streamline student learning and tracking

Weather App

Jan 2026

JavaScript, API Integration, HTML, CSS

GitHub

- Developed a weather application to fetch real-time weather data based on user-input city efficiently
- Integrated third-party API for live updates including temperature, humidity, and detailed weather conditions
- Designed a responsive and user-friendly interface for better overall usability across multiple devices

Education

B.Tech in Computer Science

2022-2026

Moradabad Institute of Technology

Intermediate (Class XII)

2021-2022

P.S.S Inter College, Amroha
